RE: Docket no. 99P-1340/CP 1

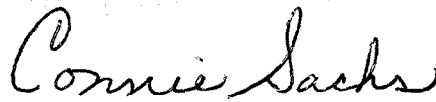

To Whom It May Concern:

Please put a warning sign of the perfume, Eternity. Refer to Docket No. 99P-1340/CP 1

I, and many of my family and friends, are very sensitive to the toxic chemicals being placed into fragrances. In fact, because of the ubiquitous use of fragrance in so many products, I am confined to my home. My nervous system gets overwhelmed when I smell toxic chemicals. My symptoms are severe and last for days. If I stayed in an area where I was assaulted by these chemicals, I would further damage my nervous system. Many people get headaches, nose pain and bleeding, sneezing and itching, etc. My problems are much worse, giving me pain, lack of concentration, light-headedness, visual problems, etc. This is very serious. It has nothing to do with not liking the odor. We cannot control our very debilitating symptoms. At least let us know what is in the fragrance. Don't people have a right to know if they are using a product that has been tested and labeled as toxic or an allergen?

Thank you for your consideration.

Sincerely,

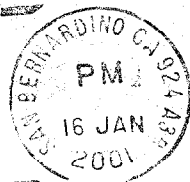

Connie Sachs
